# Solihull Clinical Commissioning Group (CCG) Finance & Performance Committee

### **PERFORMANCE REPORT**

| Meeting Date:      | 10 July 2013   |
|--------------------|--|
| Report Title:      | Heart of England Foundation Trust (HEFT) (Acute and Solihull Community) – Month 1 / 2 - 2013/14; Solihull CCG Population Performance and (Month 12 - 2012/13 and Month 1 - 2013/14)  |
| Prepared by:       | Neil Walker – Chief Contract and Performance Officer   |
| Presented by:      | Neil Walker – Chief Contract and Performance Officer   |
| Purpose of Report: | The purpose of this Performance Report is to provide a broad picture of Operating Framework performance from a national, regional and local perspective, as appropriate. The report also seeks to show an historical perspective as well as contemporary.  |
|                    | It is not the purpose of this report to enter into detailed analysis of any one area of performance given the breadth of performance measures that readers need to be sighted on. However, the report will flag up performance issues that require more in-depth analysis and feedback in subsequent meetings. |
|                    | This report aims to complement Finance, Quality and Safety and QIPP Delivery issues that are covered in other regular reporting to the CCG Board and its sub-committees.   |
| Summary/Problem:   | <ol> <li>This month comprises the following:         <ol> <li>New NHS England CCG Assurance Framework with summary performance metrics for:</li></ol></li></ol>  |
| Option/Solution:   | Solutions are varied and require a mixture of contractual performance management and collaborative operational/partnership working.  |
| Recommendation:    | For information and assurance as well as challenge around further analysis and action required.  |
| Time Required:     | 30 minutes.  |

### INTRODUCTION

The purpose of this Performance Report is to provide a broad picture of Operating Framework performance from a national, regional and local perspective as appropriate. The report also seeks to show an historical perspective as well as contemporary. It is not the purpose of this report to enter into detailed analysis of any one area of performance given the breadth of performance measures that readers need to be sighted on. However the report will flag up performance issues that require more in-depth analysis and feedback in subsequent meetings. This report seeks to avoid undue overlap with Finance, Quality and Safety and QIPP Delivery, which is covered in other regular reporting to the CCG Board and its sub-committees.

This month comprises the following:

- 1. New NHS England CCG Assurance Framework with summary performance metrics for:
  - a. NHS Constitution Rights Month 2 (2013/14)
  - b. Other HEFT Acute KPIs Month 2 (2013/14
  - c. HEFT Community KPIs month 2 (2013/14)
- 2. Solihull CCG activity trends and key messages Month 12 (2012/13) and Months 1-2 (2013/14)
- 3. HEFT Acute and Community deeper dive
  - a. A&E 4-Hour wait
  - b. Ambulance Handover
  - c. Referral to Treatment
  - d. Cancer Access
  - e. Stroke Care
- 4. Appendix 1 Solihull/HEFT demographic triangulation with acute admission and bed-day demand.
- 5. Appendix 2 Solihull CCG activity trend charts and deeper analysis by provider and point of delivery Month 12.

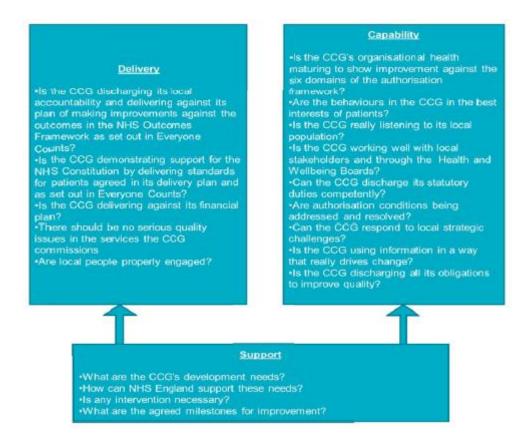

### 1. CCG ASSURANCE FRAMEWORK - 2013/14

In May 2013 NHS England published their draft proposals for 'CCG Assurance Framework 2013/14'.

A key part of this is the assurance process which identifies how well CCGs are performing against their plans to improve services and deliver better outcomes for patients, as well as working together to assess how they can realise their full potential and provide support on that journey. Sitting alongside NHS England as fellow commissioners, CCGs need to secure quality today and transform services for the future.

NHS England will look at three core elements of assurance:

- 1. **Delivery** Ensuring that the CCG is delivering for its population, the full range of outcomes and standards (both national and local) agreed in its plan.
- 2. **Capability** Ensuring the CCG is set up to serve patients and communities effectively, both now and for future generations, with the required skills and knowledge, and is exhibiting the appropriate behaviours.
- 3. **Support** Determining the nature and level of support a CCG needs to be a great commissioner.

The CCG Assurance Framework distinguishes between; (i) the ongoing assessment of performance and delivery, which is proposed to involve quarterly checkpoint meetings where NHS England will review information which CCGs will publish for the local populations; and (ii) an annual health check which will consider both the CCG's track record and its organisational health as a predictor of its future success.

Solihull CCGs first assurance meeting the Birmingham, Black Country and Solihull Area Team of NHS England took place on 4 June 2013 (an update was provided to the June CCG Governing Body).

The ongoing quarterly assessment is based on a Balanced Scorecard of covering:

- Are local people receiving good quality care?
- Are patient rights under the NHS Constitution being promoted?
- Are health outcomes improving for local people?
- Are CCGs commissioning services within their financial allocations?
- Are conditions of CCG authorisation being addressed and removed (where relevant)?

The CCG Balanced Scorecard will be rated Green/Amber-Green/Amber-Red/Red

Selected in-year aspects of Provider performance is covered within the second domain: 'Are patient rights under the NHS Constitution being promoted?'.

The following two pages detail NHS Constitution performance for HEFT acute services, both Solihull CCG as coordinating commissioner, and for Solihull CCG's registered population (irrespective of provider).

The report then presents wider selected performance metrics contained within the 2013/14 for HEFT acute and community service contracts. This is a followed by more detailed information for key areas of HEFT performance that fall below national operating standards.

# 2. HIGH LEVEL BSOL CCG SUMMARY BY POINT OF DELIVERY (YEAR ON YEAR % CHANGE IN ACTIVITY)

### A. 2013/14

SUS data for months 1-2 is available to commissioners however there have been significant is issues with Specialised Services identification rules which have markedly changed in 2013/14 due to the increased scope of specialised services commissioned by NHS England.

Central Midlands CSU are currently working to apply the same specialised service identification rules to pre-2013/14 data sets as well as the 2013/14 data to enable consistency of multi-year trend analysis (due to the complexity of the task this is taking longer than originally anticipated for local providers including HEFT and UHB a local derogation of the 2013/14 national algorithm was required because certain services that were definitely within the scope of prescribed specialised services in 2013/14 were not being picked up as assignable to NHS England commissioning organisations.

The CSU will be able to complete this task in time for August summary and deeper dive activity performance reporting (i.e. months 1-3) and for that performance report the type of 2012/13 analysis detailed in section 2. B below will be possible.

Other month 1-2data issues outstanding for the CSU are:

- Final reconciliation of the new PbR Maternity pathway SUS data.
- There have been data rejection problems for Birmingham Womens Hospital FT for both April and May 2013 data which would skew any multi-year activity trend analysis.

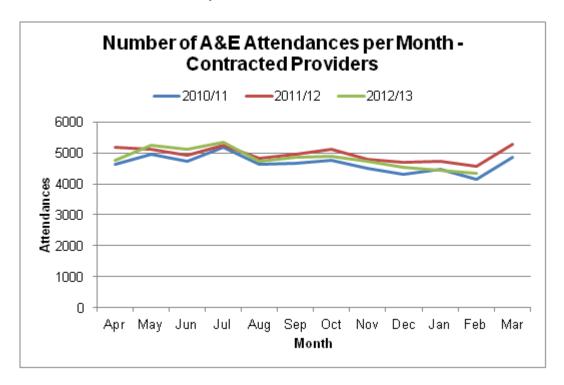

### B. 2012/13

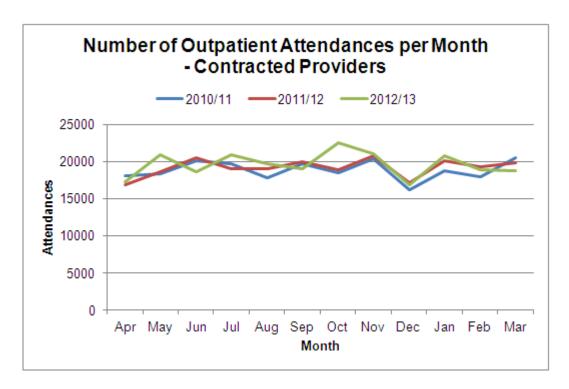

Appendix 2 provides more detailed activity, tariff cost, procedure and diagnosis type analysis.

### **Months 1-12 Point of Delivery Summary**

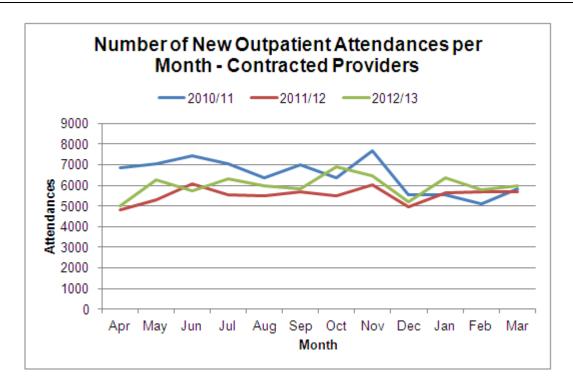

| POD                    | Solihull | ВСС  | BSC  | SWB  |
|------------------------|----------|------|------|------|
| Accident and Emergency | -2.2     | -0.2 | -1.3 | -1.6 |
| New Outpatients        | 8.0      | 2.5  | -3.7 | 7.8  |
| Review Outpatients     | 0.4      | -0.9 | -1.8 | -0.9 |
| Elective               | 8.6      | 2.0  | -3.3 | -4.1 |
| Non-elective           | 0.0      | -1.8 | -3.9 | 2.0  |

**Months 1-12 Point of Delivery 3-Year Trend Charts** 

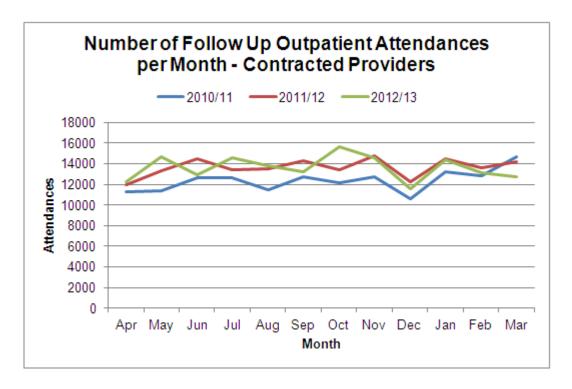

Note: Excludes HEFT physiotherapy attendances.

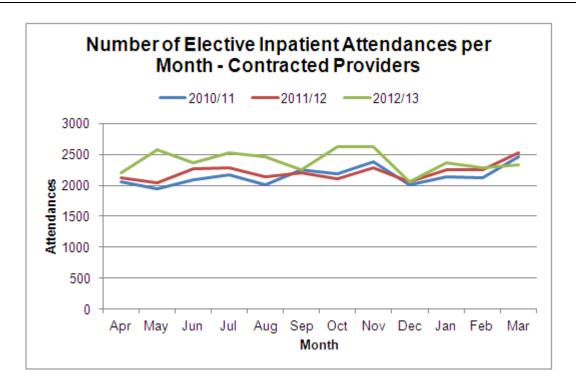

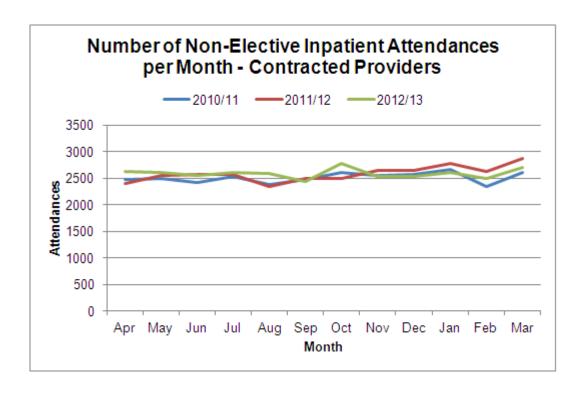

Note: Excludes HEFT physiotherapy attendances.

### Note:

- 1. Excludes HEFT physiotherapy attendances.
- 2. Obstetrics change needs to set against coding change from Obstetrics to Midwifery due to the Solihull Midwife-led Unit.

### Key Messages for Months 1-12 compared with 2011/12

### **Output Referrals**

- Outpatient by referral source:
  - GP/Other Primary Care/Self = 60.0%
  - Hospital/Community = 40.0%
- GP referred as a total of all outpatient referrals has fallen from 54.9% to 53.3%
- Referral growth GP 8.3%; Hospital/Community 19.3%

### OP New [+8% excluding HEFT Therapy OP]

- Largest growth specialities:
  - Dermatology 13%
  - Urology 14%
  - Trauma and orthopaedics 7%
  - Cardiology 7%
  - Gynaecology 11%
  - Ophthalmology 7% (this takes into account the optometric LES in place for intra-occular repeat pressure testing; but procedure-based growth in new outpatients is Wet AMD and lens insertion referrals).

### OP Reviews [+0.4% excluding HEFT Therapy OP]

- Largest growth specialities:
  - o Cardiology 21%
  - Anti-coagulation 8%
  - Trauma and orthopaedics 6%
  - Ophthalmology -8%
  - Dermatology 4%

## Electives [+8.6% elective spell growth without medical/clinical oncology factor would only be only +1.0%]

- Largest growth specialities:
  - Medical oncology 313% (but -11% tariff growth); mostly new HRG chemotherapy drug banding spells (no tariff cost)
  - Clinical oncology 262% (but +1% tariff growth); mostly new HRG chemotherapy drug banding spells (no tariff cost)
  - Gastroenterology 20% (extra 587 endoscopic day cases; +£0.44m)
  - Clinical Haematology 13%; tariff growth 9% (predominantly chemotherapy related speciality c. 66% blood cancers)
  - Ophthalmology 12% (of which: Wet AMD lucentis 10% and replacement lens insertion 2%)
  - Trauma and orthopaedics 9% (of which: 4.1% hips & knees; sub-acromial depression
     2.1%; injection of therapeutic substance 2.6%; other inpatients -8%)

### Non-Elective [0.0%]

### **Emergency:**

- Largest growth specialities:
  - Cardiology 16% (+64 cases mix of diagnostic and procedure)
  - General Medicine 4% (+587 cases: major diagnosis categories are +274 Tendency to fall,
     +190 Pneumonia, +120 Lower respiratory infection, +108 unspecified abdominal pain).
  - o Gynaecology -22%, -311 cases.

### Maternity:

- Deliveries -5.6%
- Admissions not related to a delivery -4.6%

### 3. DEEPER FOCUS ON SPECIFIC AREAS OF HEFT PERFORMANCE

### Note - Acute and Community Contracts - Monthly Penalty Tracker

The 2013/14 NHS standard contract includes mandatory penalties for a range of national operating standards. Typically some penalties are calculated monthly, while others, where applicable are applied quarterly and set against the financial credit (beneifit) that West Midlands CCGs share within their 2013/14 contract baselines as a result of the negotiated Joint Managed Risk Agreement (JMRA).

For HEFT acute the following tracker forms part of monthly CQCRM and JCCG reporting and maps the calculated contract penalty for any breaches in national operating standards in the context of West Midlands CCGs' JMRA credit built into CCG LDP values.

As at mth 2 approximately £600,000 of penalties have been set against a £11.37m benefit for CCG commissioners within the 2013/14 contract baseline values.

#### **A&E 95% WAITING TIMES**

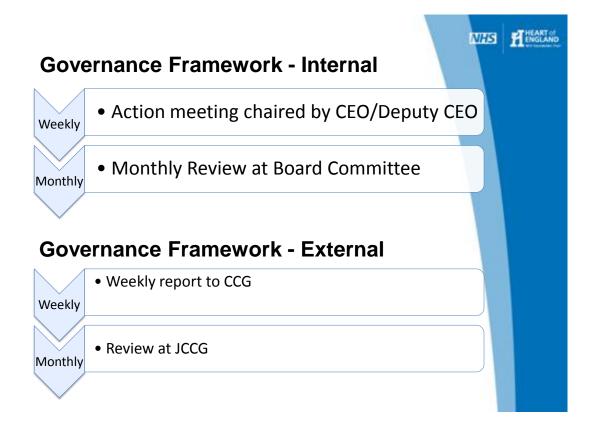

### **HEFT A&E 4-Hour Wait Recovery Plan**

Previous performance reports have provided detail of HEFT's A&E 4-Hour Wait performance during the winter period. Following an NHS England Regional Office (RO) HEFT risk summit on 22 March 2013, particularly focussing on A&E and emergency care pressures and performance well below the 95% national standard. At the March 2013 RO risk summit there was a specific action to establish an Urgent Care Sub-Group of HEFT JCCG to focus on developing a comprehensive action plan to ensure HEFT returns to sustainable 95% A&E 4-Hour Wait performance every month.

Following the March risk summit the following process ensued.

- Three JCCG Urgent Care Sub-Group meetings April/May 2013; wide clinical/manager membership from Solihull/Birmingham Cross City/South East Staffs & Seisdon CCGs and HEFT Acute
- Internal process/flow/staffing re-organisations recommended by the national ECIST (Emergency Care Intensive Support Team) are fully reflected in the Trust plan with clear delivery ownership and milestones and internal/external weekly/monthly governance framework.
- Streamlining of action plan to ensure all key ECIST issues covered, as well as supporting developments, e.g.
  - Acute Medical Clinics,
  - o Heartlands Intensive Supported Discharge,
  - Redesign of Good Hope AMU,
  - o Re-procurement of HEFT@Home for Good Hope site, and
  - o Intermediate Care capacity reviews in Birmingham and Solihull
- Ensuring that action plan is linked to a shared performance recovery trajectory.
- The action plan was approved at the second NHSE RO risk summit on 30 May 2013 following JCCG Urgent Care Sub-Group detailed discussion.

The HEFT Action Plan governance framework is as follows:

The action plan covers the following key workstreams:

### **4 HOUR PERFORMANCE GOVERNANCE FRAMEWORK**

| WORKSTREAM                       | OVERVIEW  |
|----------------------------------|---|
| E-Jonah                          | Implementation of E-Jonah boards on all wards to provide live data on progress against predictive date of discharge. It will support a proactive approach to discharge and identify any constraints to progress. This will improve the flow of patients through the Trust by reduction in length of stay. |
| Winter Staffing                  | Programme of work to ensure that additional flex capacity open in the winter is fully staffed. This will deliver improved patient management through the system.  |
| 18/7 Restructure                 | Clinical and managerial infrastructure to support safe patient flow   |
| GHH AMU change                   | A departmental reorganisation to provide a section in AMU dedicated to the rapid throughput of patients, to enhance patient flow, to create capacity and improve ambulance handover times   |
| Supervisory Ward Sisters         | Senior ward leadership to support safe and timely discharge, improving flow and reducing length of stay   |
| HEFT @ Home Procurement/Capacity | Additional capacity external to the hospital to facilitate faster discharge and reduce length of stay   |
| Section 2/5 Process              | A project to deliver closer working relationships with local authority colleagues to improve the management of complex discharges, reducing length of stay and increasing capacity.   |
| ECIST actions                    | A programme of work based on the recommendations made by ECIST following their visits to GHH and BHH  |
| Ambulance Handover               | A project to ensure that ambulance handover times improve to support improved flow through A&E  |

The focus of the actions detailed in the plan is to deliver improved capacity and flow in the organisation with an associated reduction in length of stay

### Planned A&E 4 Hour Wait Improvement Trajectory

The forecast performance for June 2013 is likely to fall below 95%. Performance continues to be monitored closely through the daily Directors' reports available. The JCCG Urgent Care Sub-Group also scrutinises cross-site performance in the context of how the agreed 4-Hour recovery actions are being delivered against agreed milestones as well as comparative local acute trust A&E 4-Hour wait performance. In this context, it should be noted that HEFT, Trust-wide, has the third largest A&E volume in England (Sandwell and West Birmingham NHS Trust is the ninth largest A&E provider).

#### A. AMBULANCE HANDOVER TIMES

The full hospital turnaround process comprises:

- 1. Ambulance arrival to clinical handover to type 1-3 emergency department; timeline 0-15 minutes
- 2. Handover to ambulance crew clear to respond to next call; timeline 16-30 minutes

The relevant national operating standards for 2013/14 built into the NHS Standard Contract are as follows:

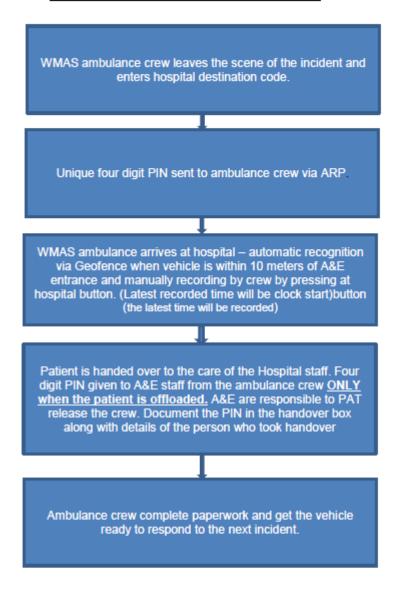

|        | National Quality<br>Requirement  | Threshold<br>(2013/14)      | Method of<br>Measurement<br>(2013/14)                      | Consequence of breach  | Monthly or<br>annual<br>application of<br>consequence |
|--------|--|-----------------------------|--|--|---|
| ANS4   | All handovers between<br>ambulance and A & E<br>must take place within<br>15 minutes   | Handover >15<br>minutes     | Review of monthly<br>Service Quality<br>Performance Report | £200 per patient<br>waiting over 30<br>minutes   | Monthly   |
| ANS5   | All handovers between<br>ambulance and A & E<br>must take place within<br>15 minutes   | Handover > 15<br>minutes    | Review of monthly<br>Service Quality<br>Performance Report | £1,000 per patient<br>waiting over 60<br>minutes (in total, not<br>aggregated with<br>CB_S7a consequence)                            | Monthly   |
| ANS8   | Trolley waits in A&E   | Any trolley wait > 12 hours | Review of monthly<br>Service Quality<br>Performance Report | £1,000 per breach  | Monthly   |
| A&E wa | iits   |                             |  |  |   |
| AOS5   | Percentage of A & E attendances where the patient was admitted, transferred or discharged within 4 hours of their arrival at an A&E department | Operating standard of 95%   | Review of monthly<br>Service Quality<br>Performance Report | 2% of revenue derived<br>from the provision of<br>the locally defined<br>service line in the<br>quarter of the under-<br>achievement | Quarterly   |

In terms of contractual levers to improve HEFT's ambulance handover performance:

- Solihull CCG is maintaining a monthly 'fine tracker' based on national contract rules
- Regarding Ambulance Handover the BSOL Urgent Care Collaborative team has supported an Ambulance Turnaround Times Project Team to coordinate the process for the implementation of Turnaround Fines.
- A Black Country, Birmingham and Solihull wide proposal on handover fines based on national rules and local validation processes was provided to BSOL CCGs on 15 May 2013 for internal review. This process, in terms of penalties based on the above contract rules, will operate from June 2013 (Month 3).
- There is an issue to be resolved with HEFT as the operating standard related to ambulance conveyances to type 1/2/3 A&E Department, and on the Solihull Hospital site ambulances convey patients to the Acute Medical Unit for logistical reasons rather than the Emergency Department.
- The HEFT JMRA already incorporates a material sub-PbR tariff credit for all West Midlands CCG signatories and therefore A&E and Ambulance Handover penalties will be calculated and reported on, but will be set against this LDP value credit.
- Where there is over-performance on the 13/14 LDP baseline; HEFT will be able to apply to the JMRA CCGs for funding against the 1% JMRACCG reserve set aside for specific demand reduction, outcomes improving initiatives.
- The 13/14 NHS standard contract in General Condition 9 Contract Management allows for Contract Query, Remedial Action Plan or Joint Investigation processes to be employed as and where appropriate.

The actual handover process is shown in the diagram below.

### <u>Hospital Turnaround Process</u>

- It is the responsibility of the ambulance crew to release the four digit PIN to the A&E staff in a timely manner.
- It is the responsibility of the A&E staff to enter the four digit PIN to PAT release the crews on the online CAD following clinical handover within 15 minutes of arrival at A&E
- If there are any problems encountered regarding the four digit pin contact Emergency Operations Centre (EOC) or the Hospital Desk (ARP 60905 or telephone 01384 246373)
- It is the responsibility of the ambulance crew to be in a position to respond to another incident within 15 minutes following clinical handover.
- Where it is not possible to be able to be in a position to respond to another incident contact EOC or Hospital Desk giving details of the reason for delay (ARP 60905 or telephone 01384 246373).

HEFT, as part of their A&E 4-Hour Wait recovery plan detailed above, expect to achieve from June across its three sites, at least 60% of patient arrival to ambulance handover to ED taking no longer than 30 minutes.

The charts below show HEFT's percentage performance against handover within 15 minutes comparing April/May 2012 with April/May 2013 in the context of all BBCSOL acute sites.

### Summary results:

- Ambulance conveyances to HEFT in April/May 2013 were slightly lower than the equivalent period 12 months ago.
- Arrival to handover within 15 minutes performance for HEFT's three sites compared with 12 months is variable.
- Arrival to handover within 30 minutes performance (contract penalty threshold) for HEFT's three sites shows considerable improvement since March 2013. HEFT's performance is not materially different to other medium/large acute trusts across BBCSOL.
- Arrival to ambulance crew clear (turnaround) within 30 minutes for HEFT's three sites compared to 12 months ago materially better and above 60% target performance in HEFT's A&E Governance Framework. Biggest challenge is to improve ambulance turnaround times at Heartlands which has the lowest BBCSOL acute site performance.

### B. REFERRAL TO TREATMENT

The national profile of elective activity up to April 2013 can be summarised in the following two charts:

### Waiting list in England, adjusted for step changes

### Admissions per working day in England, all specialties

### <u>HEFT Waiting List Movement – April to May 2013</u>

### 1. Admitted Patient List

Small increase since last month in the size of the waiting list for patients waiting for admitted treatment and size of 18+ week tail.

|       | Weeks |       |     |       | Last N | st Month Per |     |      | Percer | ntage | 9   | % Last Month |       |       |     |
|-------|-------|-------|-----|-------|--------|--------------|-----|------|--------|-------|-----|--------------|-------|-------|-----|
| 0-17  | 18-25 | 26-51 | 52+ | 0-17  | 18-25  | 26-51        | 52+ | 0-17 | 18-25  | 26-51 | 52+ | 0-17         | 18-25 | 26-51 | 52+ |
| 2,456 | 104   | 103   | 0   | 2,304 | 112    | 81           | 0   | 92%  | 4%     | 4%    | 0%  | 92%          | 4%    | 3%    | 0%  |

### 2. Non-Admitted Patient List

Non-admitted waiting list size broadly constant, small increase in 26+ week waiters.

| Weeks  |       |       | Last Month |      |       |       | П   | Percentage |      |       |       |     | % Last Month |    |       |       |     |
|--------|-------|-------|------------|------|-------|-------|-----|------------|------|-------|-------|-----|--------------|----|-------|-------|-----|
| 0-17   | 18-25 | 26-51 | 52+        | 0-1  | 18-29 | 26-51 | 52+ | ][         | 0-17 | 18-25 | 26-51 | 52+ | 0-1          | ا7 | 18-25 | 26-51 | 52+ |
| 10,979 | 243   | 151   | 0          | 11,0 | 3 247 | 134   | 2   | ][         | 97%  | 2%    | 1%    | 0%  | 97           | %  | 2%    | 1%    | 0%  |

### 3. Incomplete Pathway Patient List

Increase in non-admitted waiting list size, but a larger proportion of the total list are now waiting less than 18 weeks but absolute volume of 18+ week wait volume has continued to reduce from 1,225 patients to 1,176.

| Weeks  |       |       |     | Last Month |        |       |       |     | Percentage |    |       |       | % Last Month |      |       |       |     |

| Target                    | 92.0%               | 92.0%  | 92.0%  | 92.0%  | 92.0%  | 92.0%  |

Despite HEFT comfortably meeting overall the national standard of 92% of patients waiting less than 18 weeks during 2012/13, two specialities consistently failed to achieve the standard; Trauma and Orthopaedics and General Surgery.

Solihull CCG, at its November Contract Review Board meeting with HEFT for both specialities, provided clear remedial actions and improvement trajectories for the two specialities as follows:

With regard to achievement verses trajectory to March 2013, the position to 31 March 2013 was:

- General Surgery March 2013 trajectory >92.0%; actual 91.40%
- Trauma and Orthopaedics March 2013 trajectory 92.0%; actual 87.0%

In 2013/14 to date, both specialties have continued to fail the meet national operating standard, which is now in 2013/14 mandated at individual specialty level.

Currently 92% of T&O's total admitted and non-admitted waiting list is achieved at the 24 week milestone compare with regional and national norm of no longer than 17-20 weeks. Solihull CCG has met with the T&O senior team to start to develop a plan at individual patient level to ensure that the waiting list tail is reduced from just under 52 weeks currently to no patient waiting longer than 26 weeks by March 2014. This will involve a similar approach to that successfully employed to eliminate 52+ week waiters in 2012.

This will be monitored at individual patient level for the remainder of 2013/14.

Solihull CCG agreed with HEFT at the June 2013 Clinical Quality Contract Review meeting that a similar meeting/approach will be required for General Surgery.

From April 2013, Solihull CCG is imposing mandatory penalties as specified in the 2013/14 NHS Standard Contract for any specialties that fail to achieve the national operating standard of 92% of specialties waiting being less than 18 weeks. The penalty calculation is based on Schedule 4 – Part G of the Particulars section of the NHS Standard Contract.

### **D2 – Admitted Pathways**

| Admitted (Adjus          | ted)   |        |        |        |        |        |

HEFT is meeting the 95% national standard in all specialties.

### **D4 - Patients Waiting >52Weeks**

As part of HEFT and Solihull CCG regular monitoring of the 0-52 week HEFT waiting list profile two patients in the May non-admitted data were identified as waiting over 52 weeks.

- 13P Birmingham Cross City CCG General Surgery; the patient was removed from waiting list at patient's own request to prioritise treatment of a second condition.
- 05P Solihull CCG General Surgery; surgery date confirmed 27 June 2013.

Solihull CCG Registered Population.

- 1 HEFT case (see above);
- 2 complex spinal patients at ROH (NHSE England Specialised Services is responsible commissioner.
   Expect all over 52 week patients to have been treated by the end of July 2013) as agreed with NHSE
   Birmingham and Black Country. ROH since May 2013, have brought in additional consultant
   capacity from Manchester. Patients have been offered choice of alternative provider in England
   (limited take up). 1 Solihull patient has a 24 May TCI date

The national operating standard ANS3 – Zero tolerance RTT waits over 52 weeks applies. Each breach attracts a £5,000 penalty.

### C. <u>Cancer Access</u>

HEFT for April 2014, delivered all the national operating standards for the two week, 31 day and 62 day cancer access targets.

Solihull CCG for April 2013 its registered population met all cancer access targets with the exception of:

Maximum 31 day wait for subsequent treatment where treatment is a course of radiotherapy.

Solihull CCG Breaches: 3/41 patients; 1 patient University Hospital Birmingham 48 days (due to available radiotherapy capacity to bring treatment date forward). For University Hospital Coventry and Warwickshire, 1 patient waiting 34 days (ambulance conveyance issue regarding planned appointment on 19 March 2013). 1 patient waiting 34 days (plan not ready for treatment on 23 April 2013).

The CCG will check the May cancer access commissioner report to ensure these three patients are no longer waiting for their first course of radiotherapy.

### 100+ Cancer 2 Week Waiters:

Snapshot position: as at 25 June six 2 week query cancer referred patients have been waiting more than 62 days.

### In summary

| Referring PCT | Previous<br>Reported? | Waiting Time<br>(days) | First treatment Scheduled | Other Comments  |
|---------------|-----------------------|------------------------|---------------------------|---|
| BEN           | Yes                   | 173                    | 5 Aug 13                  | Patient overseas for 3 months; surgery scheduled for return                       |
| BEN           | No                    | 127                    |                           | Patient declined surgery for 2 months due to carer responsibilities               |
| BEN           | No                    | 118                    | 1 Aug 13                  | Patient needs to lose weight due to anaesthetic risk before radical prostatectomy |
| BEN           | No                    | 110                    |                           | Further anaesthetic opinion and echocardiogram (5 July – patient choice)          |
| BEN           | No                    | 106                    | 19 Aug 13                 | Patient needs to lose weight due to anaesthetic risk before radical prostatectomy |
| BEN           | No                    | 105                    |                           | Further bone biopsy re-scheduled twice (patient choice)                           |

### D. Stroke

HEFT's Performance in 2012/13 across its 3 sites against the national standard of 80% of stroke patients spending 90% of their admitted time on a designated stroke ward was as follows.

# TRUST KEY PERFORMANCE INDICATORS

| KPI<br>Ref | PCT MAIN CONTRACT INDICATORS   | TARGET       | Q1    | Q2    | OCT-12 | NOV-12 | DEC-12 | Q3    | JAN-13 | FEB-13 | MAR-13 | Q4    | TRUST<br>YTD |
|------------|--|--------------|-------|-------|--------|--------|--------|-------|--------|--------|--------|-------|--------------|
| L006       | % of Stroke Patients Spending 90% or more of their stay on Stroke Unit | <u>≥</u> 80% | 87.2% | 86.8% | 80.5%  | 90.5%  | 81.6%  | 83.7% | 79.6%  | 78.3%  | 64.6%  | 74.7% | 83.4%        |

The Trust, having met the national standard for the first three quarters (albeit not at all three sites, Solihull being particularly problematic), noticeably failed to meet the standard in Q4. Overall outturn performance remained above the national standard for the full 2012/13. Nevertheless HEFT's performance record against this standard in recent years has been patchy and in 2011/12 faced a considerable withholding of funds by commissioners. The March performance sharply declined raising real concerns about April and Q1 performance in 2013/14.

Performance across the three sites in 2012/13 is summarised in the following table.

|                  | Q1  | Q2  | Q3  | Q4  | YTD |
|------------------|-----|-----|-----|-----|-----|
| <b>Good Hope</b> | 88% | 95% | 88% | 75% | 87% |
| Heartlands       | 88% | 90% | 87% | 80% | 86% |
| Solihull         | 86% | 74% | 75% | 70% | 76% |
| HEFT             | 87% | 87% | 84% | 75% | 83% |

In April 2013 the Trust overall, for a fourth month, failed to achieve the national standard, Good Hope marginally achieved the national standard at 81% and Heartlands achieved 86%. However, performance at the Solihull Hospital site in April 2013 (and March) was a very poor 52%, having not achieved the national standard since July2012.

An exception report was provided for the May CQCRM that met on 30 May 2013, which Dr. Martin Sandler attended and presented.

The reasons provided for under performance on the Solihull site were:

- Bed capacity pressures and A&E 4-Hour performance
- AMU assessment processes causing inconsistent prioritisation of stroke patients
- Stroke Co-ordinator is a dual ward-based role creating inconsistent ability to respond to stroke alerts
- Absence of data collection role at Solihull results in incomplete and slow data collection and input
- Repatriation to GHH is frequently delayed resulting in a capacity pressure within the Stroke Unit
- Discharge protocols to be revisited with key partners (social worker, therapists and intermediate care).

It should be noted that the Solihull site is the host for out of hours stroke thrombolysis care and ambulance conveyance. This service is expected to move to Heartlands by the end of 2013 as part of the regional review of hyper acute stroke units (HASUs).

The above are not new issues and some of the above at least have been part of the detail of previous HEFT exception and the question is why some of the above issues have not been resolved in 2012/13.

| Action   | Date Complete | Expected Impact  |
|--|---------------|--|
| Book band 5 bank nurse to backfill one shift a day to release the stroke coordinator to ensure stroke patients arrive in ward 8 within the target timeline | May 2013      | This will ensure the stroke co-ordinator is a dedicated resource to getting stroke patients to ward 8 and delivering our KPIs                        |
| Recruitment of a data capture clerk  | June 2013     | This will ensure we are able to report timely information  |
| Revise SOPs (Standard Operations<br>Procedures) to ensure delivery of stroke<br>targets  | May 2013      | This will ensure consistency of approach for protecting beds and include repatriation protocols  |
| Reinforce bed protection policy  | May 2013      | Reinforcement of stroke pathway to A&E, AMU, Site Capacity and Bed Management teams, Senior management teams, Hospital at Night teams and ward areas |
| Early adopter of E Jonah   | June 2013     | Technology plus a multi disciplinary approach to managing discharge will help improve the flow of patients   |

|  |               | through ward 8  |
|--|---------------|---|
| Develop a HASU receiving bay in BHH AMU  | June 2013     | Improved bed availability, patients remain within proximity of medical staff for rapid clerking                       |
| Review discharge/repatriation processes  | August 2013   | Work with key stakeholders to review current processes and together develop innovative solutions to improve discharge |
| Implementation of stroke hyper acute reorganisation and redesign of stroke pathways (this will include repatriation to Solihull, Early Supported Discharge, stroke reviews ) | December 2013 | Ensure compliance   |

HEFT expected improvement in stroke performance on the Solihull to be:

- May 60% [actual achieved 75.0%
- June 70%
- July 75%
- August onwards 80%

In May overall Trust-wide performance markedly improved to 86.5% (April 75.7%). Site specific performance was:

|            | April<br>13 | May<br>13 |  |  |
|------------|-------------|-----------|--|--|
| Good Hope  | 80.95%      | 90.48%    |  |  |
| Heartlands | 85.71%      | 90.00%    |  |  |
| Solihull   | 56.67%      | 75.00%    |  |  |
| HEFT       | 75.70%      | 86.50%    |  |  |

### **APPENDIX 1**

### **Solihull/HEFT Demographic Triangulation**

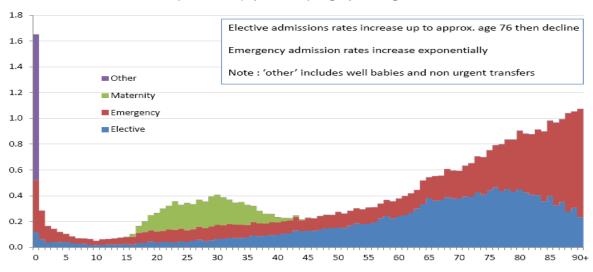

1. Solihull's annual demographic change by age band (especially over 65)

### 2. HEFT spells by point of delivery demand curve by age band

### **Hospital Admission Rates 2010/11**

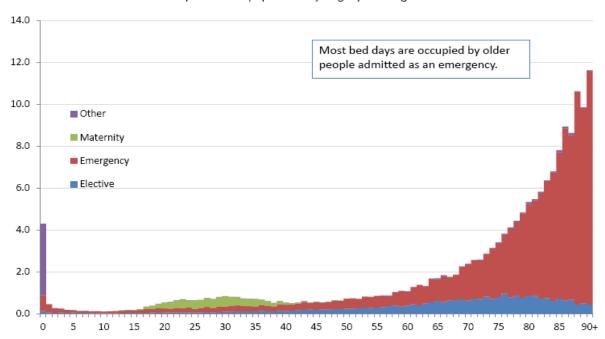

Heart of England NHS Foundation Trust per head of population by single year of age

**3.** HEFT bed days (length of stay) demand curve by age band.

### Hospital Bed-Day Usage Rates 2010/11

### Heart of England NHS Foundation Trust per head of population by single year of age

### **APPENDIX 2**

#### **SOLIHULL CCG ACTIVITY TRENDS - DETAIL**

Point of Delivery Trend Charts – period months 1-12 (April 2012 – March 2013)

### **Explanatory Notes**

#### Note 1:

Solihull CCG was formally advised by CSU BI on 18 February that an issue arose as part of the automated processing of SUS data within the Birmingham and Solihull Cluster Data Warehouse. The process was allocating the Points of Delivery (POD) to Finished Consultant Episodes (FCEs) rather than spells (which are made up of one or more FCES) for all inpatient activity.

This is an error that impacts on all local CCG commissioners, not simply Solihull.

To correct the error CSU BI have 'walked through' the entire processing and determined that to fully eradicate the error, required a rewrite of the full report from the CSU Warehouse. This task was completed by 21 February 2013. CSU BI has indicated that new safeguards have been built into the monthly CCG activity workbook to ensure there are no such errors in future. CSU BI has also checked the A&E and Outpatient activity and neither of these uses the POD field and therefore shows no errors.

### Note 2:

HEFT outpatient therapies (physiotherapy, occupational therapy, SALT and dietetics) which were not counted in April - September 2011 as these services were subject to a block agreement for that period. Therefore to preserve consistency between years outpatient comparison between 2012/13 and 2011/12 are shown without therapy outpatients

#### Note 3:

As a result of HEFT introducing a new Outpatient Management System from December 2010 there is approximately a 9% reduction in the counting of new outpatients and a 9% increase in the counting of review outpatients at the Trust.

#### Note 4:

When considering the percentage change in elective and non-elective spell admissions it is important to triangulate this with:

- 1. Solihull's annual demographic change by age band (especially over 65)
- 2. HEFT spells by point of delivery demand curve by age band
- 3. HEFT bed days (length of stay) demand curve by age band.
